

Ball Valve Lockout V423

Seite 1 von 1

LOCKING THE HAND LEVER AND SECURES IN THE OFF POSITION

The robust sheet steel ball valve lockouts prevent unauthorized valve opening.

To guarantee system safety during maintenance work, the valve lockout offers various holes for the exact positioning of the padlock, ensuring stability.

Technologies

- Stable and secure, made from powder-coated steel
- Two sizes for most common ball valves
- A number of holes for exact positioning of the padlock gives more stability
- Best used on hard-to-reach pipes

Use and application

- Block access to ball valves during maintenance

Variants

- V423: Small 0,25" to 1"
- V426: Large 1,25" to 3"
