

TOTAL MODULAR: THE VIDEO INTERCOM SYSTEM

See people in front of the door, talk to them, open the door. Modularly adaptable to any building and easy to install - with the appropriate installation frame.

Discreetly concealed: your ModuVis installation

When installing ModuVis modules (video module, bell button module, etc.), you can choose between surface and flush mounting. And you can choose between a single installation frame (for 1 module), a double and triple frame (for 3 modules). This mounting frame is suitable for flush mounting of 3 modules.

Totally modular, extensively expandable

A clear advantage: depending on the number of flats or living areas and local requirements, modules are simply added to the system, e.g. info module with name plate, bell button module or numeric keypad for keyless access via PIN code. If 3 modules are set, the 3-fold installation frame is the first choice. If 3 modules are planned, but not all of them are set during the initial installation, the 3-fold frame can also be selected and the unoccupied part covered with an empty module (blind cover).

Technologies

- Triple frame for flush mounting for the door intercom system ModuVis
- Weather-resistant anodized aluminum housing
- Including matching flush-mounted box
