

An everyday cable lock

The ABUS Cable Lock Numerino 5412C is modest and flexible: at 85cm long and with a practical combination lock you can quickly and discreetly secure your bike and in doing so deterring casual thieves. It may be components that are to be attached to the bicycle, or the bike itself, which must be secured against theft for a short time in everyday life.

Because of its low security level and low weight, the ABUS Cable Lock Numerino 5412C is often used as a second lock. Its 370g weight is barely noticeable, so you can carry it in addition to your main lock.

Technologies

- 12 mm thick, high-quality steel cable
- Plastic coating to prevent damage to the bicycle's paintwork
- Dark-touch function enables use in the dark, thanks to special number embossing
- Two-component number reels ensure long-term readability of the digits
- The number code can be set individually

Operation and use

- Great protection where there is a low risk of theft
- Ideal for protecting low-range bicycles and children's bikes

Tips

- Cable locks are characterised by good flexibility and relatively low weight
 - The combination lock is particularly well suited for use by several people
