Primo 5412K/85/12 black + bracket SCLL

ABUS
Security Tech Germany

An everyday cable lock

The ABUS Primo 5412K Cable Lock is a sophisticated, low-cost cable lock which offers good everyday protection where there is a low risk of theft.

The lock with the 12mm-thick steel cable weighs just 515g including the SCMU bracket, so it can also be brought along as an additional lock to secure two bikes together, for example. Of course, the ABUS Cable Lock Primo 5412K can also be used as a single lock where the risk of theft is not particularly high and the lock is intended to secure against fast, opportunistic theft. The steel 12mm-thick cable is coated in black plastic to prevent damage to the bike's paintwork.

Technologies

- 12 mm thick, high-quality steel cable
- Plastic coating to prevent damage to the bicycle's paintwork

Operation and use

- Great protection where there is a low risk of theft
- Recommended for protecting entry-level and children's bicycles

Tips

- Cable locks feature good flexibility and relatively low weight
