

Free to move with the Eycasa handset.

The Eycasa handset has many main unit functions: Use it to see people at the door on a 3.2" colour monitor. You can hear them, talk to them and, if necessary, open the door. Video and audio are transmitted wirelessly using DECT technology (1.9 GHz). When the handset accepts the conversation it switches automatically to a still image to ensure perfect audio transmission.

The range extends up to 30 metres from the main unit, depending on the structural environment, and at only 12.8 x 7.4 cm in size, you can carry the handset all round the house and garden, as easily as if it were a mobile phone.

Long standby times, flexible installation

Thanks to the integrated lithium-ion battery, the user also benefits from long standby times. The handset is simply placed in the charging cradle to charge it. This can be free-standing or mounted on the wall.

Note on the product

The Family Care camera cannot currently be viewed or operated using the handset. A handset can be integrated into an Eycasa system.

## Technologies

- Wireless handset with 3.2" colour monitor for reception of video and audio data of the Eycasa components
- Wireless range up to 30 m from the main unit, depending on the situation in the building
- See, speak, listen and switch (door opener) wirelessly
- Integrated lithium-battery
- Choice between wall or table mounting using charging cradle
- Image is automatically frozen when the call is answered
- Video stream with up to 1 fps

## Technical data - Eycasa Handset

Audio data rate	0,064
Audio frequency	1,9 GHz
Audio modulation	TDMA
Audio sensitivity	-82
Audio transmission power	20
DC voltage supply	5 V
Fastening	Table mount, wall mount
Height	128 mm
IP protection class	30
Length	19 mm
Loudspeaker	8 Ohm, 1W
Max. operating temperature	50 °C
Microphone	Yes
Min. operating temperature	0 °C
Monitor	3,2" touchscreen LCD
Net weight	0,23 kg
Number of channels	5
Power consumption	600 mA
Resolution	320 x 240
Video data rate	0,064
Video frequency	1,9 GHz
Video modulation	TDMA
Video sensitivity	-82
Video transmission power	20
Width	74 mm
Wireless range	30 (depending on site conditions) m
