

SECURE GAS CYLINDERS AGAINST UNINTENTIONAL ACCESS

It's quick and easy with the P606 gas cylinder lockout.

It is put over the valve from above like a cover and closed from below. In keeping with the LoTo philosophy, it is then secured with a padlock.

Technologies

- High-quality polypropylene: long-lasting, robust and non-conductive
- Warning sticker included
- Holds 1 padlock with up to 9 mm shackle diameter

Operation and use

- Block access to gas bottles and connections during maintenance
