WITH SECURITY AND DESIGN

P12RPS

REVERSIBLE KEYS WITH A WIDE RANGE OF COLOURS

The reversible dimple key system P12RPS offers its users high locking comfort because the modern key is equipped with dimples and does not have sharp-edged cuts. The advantage of the standard emergency function is that the door can be opened even though the keys are already inserted from one side of the cylinder. Additionally you can choose your preferred colour of the key cap from a wide range. At a glance you can see which key belongs to whom.

SECURITY FAR ABOVE THE STANDARD

The locking system P12RPS fulfils the high requirements regarding the attack resistance of the cylinder because they are standardly equipped with SKG** certificate. Moreover the patented* stop pin requests the locking permission inside the cylinder and therefore ensures the legal and technical copyright. Due to special drill protection pins made of hardened steel as well as the standard pre-snap function the manipulation of the cylinder is more difficult. The security card offers an additional protection. Only after presentation cylinders and keys can be ordered.

AVAILABLE VERSIONS

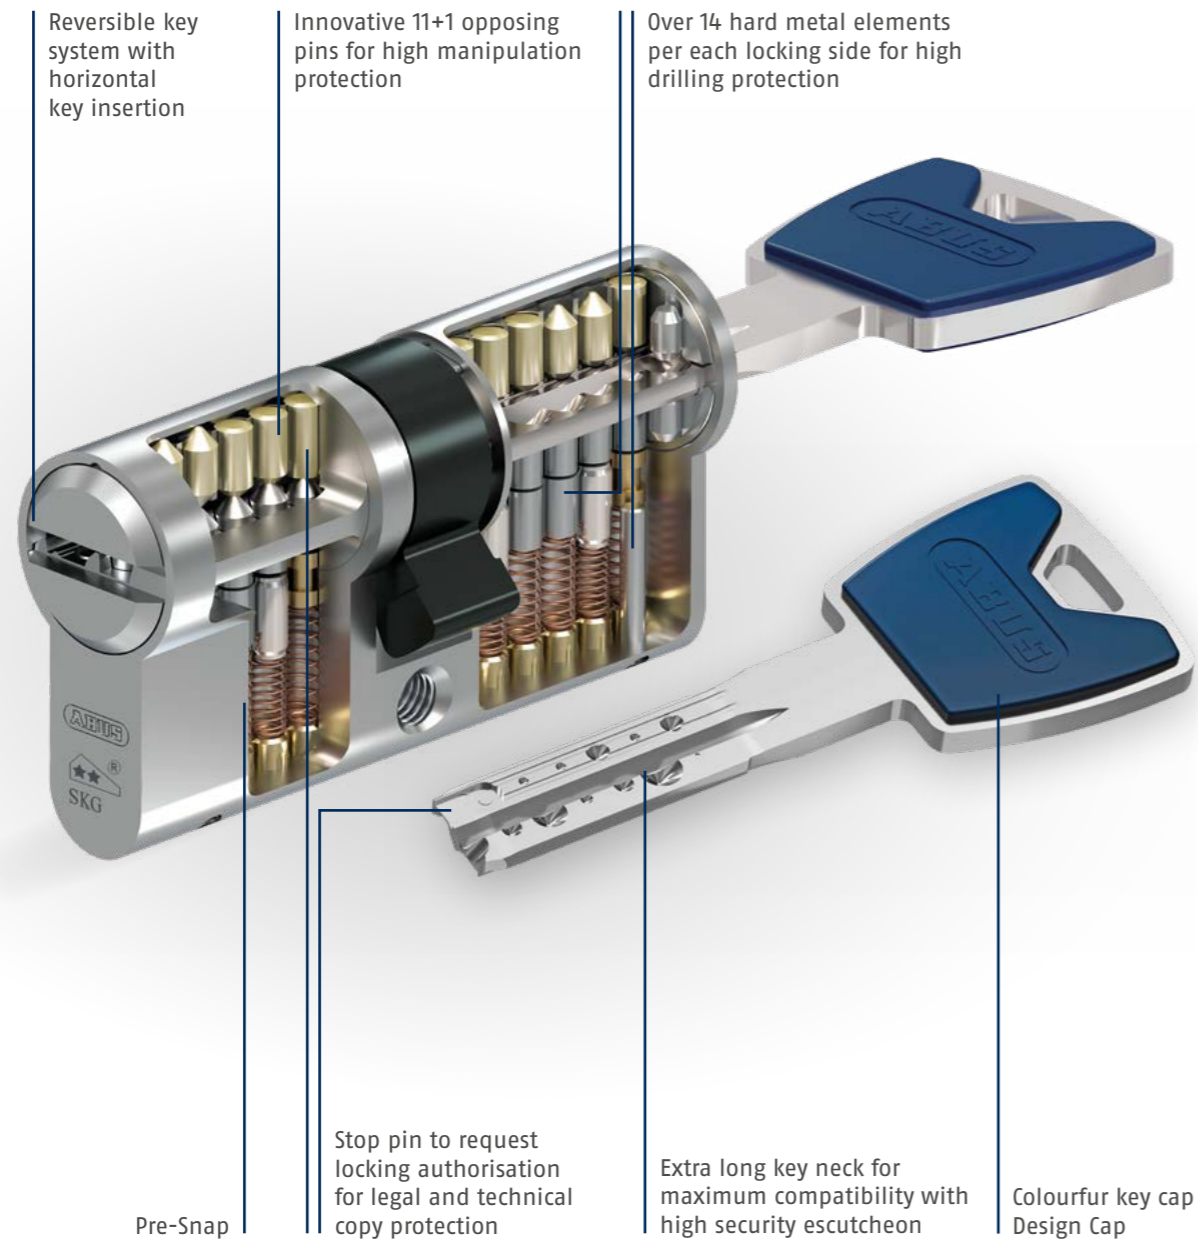

The system P12RPS is available as individual locking and service cylinder for all common cylinder types. Keyed-alike cylinders to existing cylinders can easily be reordered. Additionally the design key caps are available in 12 appealing colours.

CYLINDER EQUIPMENT

As standard we deliver individual lockings with 5 keys and the Design Cap in sapphire blue. All cylinders are equipped with pre-snap feature as standard. Double cylinders are always delivered with emergency function (GKUP). Service cylinders will be delivered without key blanks.

SYSTEM P12RPS

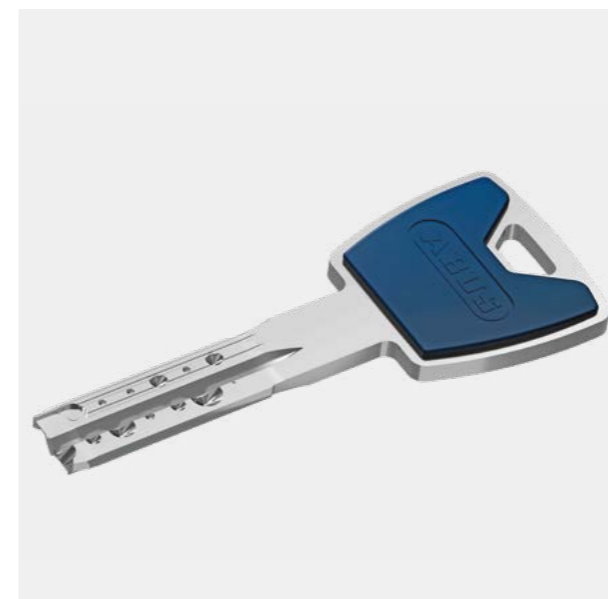

In detail

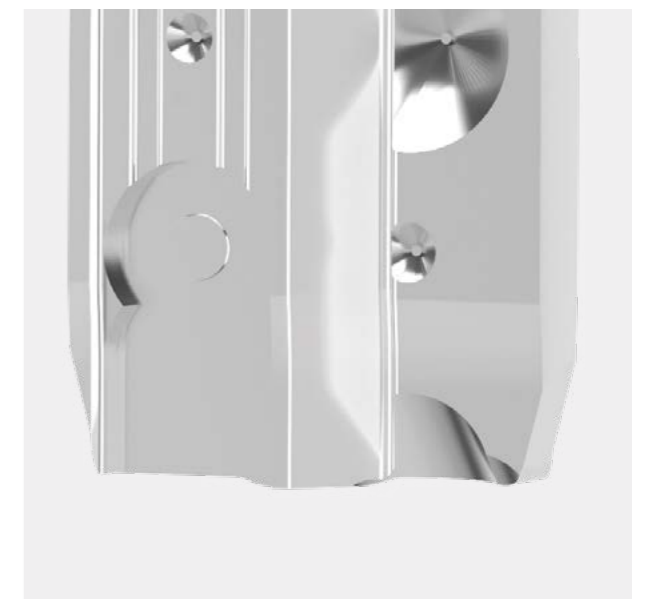

The reversible key system with horizontal key insertion offers users maximum convenience.

System P12RPS comes with a patented* key stopper in both the cylinder and the key.

The shape of the key makes it almost unnoticeable in your pocket.

This verifies that the key has the correct authorisation before opening.

* max. patent term to 2030

AS INDIVIDUAL AS YOU

Colour range

SECURITY IN COLOUR

The locking system P12RPS offers besides its security features a large variety of colours to underline the individuality. Choose your favourite colour out of twelve design colours. For sure there is the right colour available for each member of your family. Due to the colour coding you can distinguish all keys at a glance – no need to search any longer for the right key.

SYSTEM P12RPS

Highlights

Reversible key

The state-of-the-art key uses dimples instead of sharp-edged cuts for maximum comfort.

Emergency function

It allows the cylinder to be operated from one side even if a key is inserted on the other side of the cylinder.

Anti-drill protection

The P12RS is equipped as standard with over 14 hard metal elements per locking side.

One-key concept

Additional cylinders and cylinder types can be supplied for the same key.

Security card

Replacement keys and additional cylinders will only be made upon presentation of the security card.

SKG certificate**

Cylinder specially tested and certified for attack resistance.

Patent

Cylinders and keys are protected by international patents to ensure legal and protection against illegal key duplication. The maximum range is up to the specified year.

Trademark protection

A certain design element on the key has a registered trademark without a protection period in order to ensure additional protection of the key even after the expiry date of the patent(s).

TECHNICAL DETAILS

Overview

System:	P12RPS
Standard features:	SKG**; increased anti-drill protection, pre-snap, emergency function
Key:	Multiple paracentric reversible key made from nickel-plated brass with Design Cap
Key insertion:	Horizontal
Patent protection:*	✓
Trademark protection:	✓
Copy protection:	Internal key stopper
Locking rows:	2
Total locking elements:	12
Basic length:	30/30 mm and 28/32 mm for Euro profile double cylinders
Length increments:	Extensions available in 5 mm increments up to a maximum of 70/70 mm
Security card:	✓
Lock security:	Class 5 in accordance with DIN EN 1303, details available on request
Attack resistance:	Grade B
Fire resistance:	Grade B, T90
Product certification:	Certified to DIN 18252 and DIN EN 1303; SKG**
Manufacturer certification:	ISO 9001
Production:	Made in Germany

* max. patent term to 2030
