XELUS™ ME

ALWAYS MODULAR.

ALWAYS FLEXIBLE.

REVERSIBLE KEY SYSTEM

ALWAYS MODULAR. ALWAYS FLEXIBLE.

XELUS™ ME

FLEXIBILITY WITH SECURITY

High-quality workmanship, reliable and versatile. Xelus ME is a reversible key system with a very comprehensive performance promise. Thanks to the modular design, you can adjust the cylinders to the desired length in a flash. When structural changes are made, the cylinder simply changes with them. No tools are required to extend the cylinders, so length changes can be easily implemented by any technician.

AS INDIVIDUAL AS YOUR PROPERTY

From a small property to a massive building complex, ABUS offers custom master key systems based on a sophisticated modular kit. Create your own security solution specific to your building, with options for everything from cylinder types to additional special features. Each cylinder is produced specifically according to your needs, so you define your master key system individually, from the design of the keys to locking authorisations.

SUSTAINABLE SECURITY

When developing new components, ABUS aims to reduce the environmental impact of potential pollutants such as lead, and to use forward-looking manufacturing technologies. You can go into the future with Xelus ME, because the modular housing is completely lead-free and thus already meets the European requirements of the future.

FUTURE- PROOF INVESTMENT

The Xelus ME master key system can be expanded at any time, giving you maximum flexibility through developments and changes. We can deliver expansion products for your locking system many years after installation.

High-quality raw materials, high-precision manufacturing and our many years of experience mean that you can rest safe in the knowledge that your building is secure. And the fact that the lock cylinders are developed and produced in Germany guarantees premium quality and a long service life.

XELUS™ ME

In detail

The modern reversible key system with horizontal key insertion is convenient and comfortable to use. The high-quality precision profile ensures easy insertion.

The innovative shape of the key makes it almost unnoticeable in a trouser pocket. The modern key does not snap.

The Xelus ME locking system comes with the patented Inspect system in the cylinder and key. The Inspect system checks the locking authorisation

in addition to the existing locking elements when you want to open the door with the key.

CHOOSE YOUR DESIRED KEY

As we all know, there is no accounting for taste - which is why Xelus ME offers you great variety for your key design in addition to its security features: Choose your matching key from three different shapes and up to twelve different colours. Whether it is a matter of personal taste or whether you need markings for different locking authorisations, Xelus lets you choose. There is a suitable shape and colour for everyone.
