

The Zoom Camera gives you brilliant pictures round the clock - whether in the daylight or in the dark. With its 22x motor zoom and 16x digital zoom, it enables you to see clear-cut details at great distances. The Zoom Camera is equipped with a 1/4" Super HAD CCD from Sony. The high light sensitivity of the CCD element ensures excellent picture quality (470 TV lines). The horizontal viewing angle is between 6° and 47°, depending on the zoom factor, and the focal length between 3.9 and 85.8 mm. The camera sets the optimal focus automatically. But manual zoom is also possible. Below a specific light intensity, the camera switches from color to light-sensitive black/white mode. The light sensitivity is 0.7 lux. The Zoom Camera has ELC (Electronic Light Compensation), BLC (Back Light Compensation), AGC (Automatic Gain Control) and AWB (Automatic White Balance). The menu-guided programming is done with on-screen display. The built-in RS485 interface enables you to control the camera with a control console. The Zoom Camera is accident prevention certified.

Technologies

- 1/4" SONY Super HAD CCD
- 22x motor + 16x digital zoom
- Electronic switching from color to B/W
- Automatic focusing for constant high-resolution pictures
- Certified by POS in accordance with accident prevention regulations (DGUV)
