

# Terminal Distributor Surface Mount, 32-pins (brown)

Art.-Nr. VT4100B

Seite 1 von 1

With a terminal distributor flush mount, you provide wiring that is clear and easy to understand. Particularly if you install several control panels and sensors, you should fit distributors at the intersections of your building. The surface-mounted soldered distributor is tamper-protected by a cover contact. It is produced in white and brown, with 16 (VT4000) and 32 (VT4100) double solder contacts. The distributor is made of shock-resistant plastic. The solder contacts are tin-plated and thus rust-resistant. The surface-mounted soldered distributor is VdS certified.

## Technologies

- Surface mounting
- Corrosion-proof, tin-coated solder contacts
- Impact-resistant plastic
- Monitored for tampering
- VdS C (G 105063)

## Technical data - Terminal Distributor Surface Mount, 32-pins (brown)

Certifications	VdS C
Colour	brown
Colour options	white, brown
Connections	32 double solder contacts
Dimensions	(WxHxD) 175x75x19 mm
Environmental class	III
Height	75 mm
Housing material	ABS
Installation location	Surface mounting
Length	19 mm
Sabotage monitoring	Yes
VdS approval no.	G 105063
VdS class	C
Width	115 mm
