Reliable detection using passive infrared light (PIR)

The Secvest wireless motion detector is a passive infrared motion detector (PIR motion detector). This means it detects individuals moving in its detection range using their body heat and reports unauthorised access to the alarm panel.

Detector features

The angle of view of the wireless motion detector is 90°, and its detection range is up to 12 metres, depending on installation height. Its new spherical lens design makes for even more reliable detection and much more even coverage. It is also equipped with anti-creep protection.

Technologies

- Passive indoor infrared motion detector
- Detects moving body heat
- No disruptive cable
- Detection range of up to 12 m
- Modern, discreet design
- EN Grade 2 certified detector
