

GATE VALVE LOCKOUTS: SUITABLE FOR ALL SIZES

Our range of five gate valve lockouts caters to all standard valve sizes.

Made from durable polypropylene, the ABUS gate valve lockouts are built to last and are non-conductive. It can completely enclose the hand wheel of the valve and can be securely locked with a padlock. The clear visual signal indicates that the valve is closed and should not be operated, significantly reducing the risk of misunderstandings and workplace accidents.

Technologies

- High-quality polypropylene: long-lasting, robust and non-conductive
- Five sizes: Valves from 1" to 13"
- Holds 1 padlock with up to 23/64" shackle diameter
- Unique, predetermined breaking point at the top for valves with thread
